

THE LINCOLN SCHOOL

State of the Town Meeting – 11/04/2017
Comments on Options

GROUP A: L-SHAPE OPTION 2

1. Like preserving the Auditorium (1)
2. Feels too gymnasium centric - smart to locate the two gymnasiums together (2)
3. Is this option energy efficient? (1)
4. This option is too spread out, travel distance is too far (1)
5. Do we lose a playing field with this option? Cost is a major concern, many young families did not vote for the new school with State funding (1)
6. Is a more compact footprint more energy efficient? (1)
7. Every option states three entries, but every plan only indicates two entries (1)
8. Why a new theater? (2)
9. Preserves the Smith Gymnasium (1)
10. PreK should not move to the K-8 school (1)
11. Like the outdoor space around the Hubs (1)
12. Can the second floor classrooms look down onto a green roof? (1)
13. This scheme has potential in that it respects the ballfield and offers the educational goal of creating Hubs (1)

GROUP B: NORTH OPTION 1

1. Can this option be combined with Option A1 to relate better to the ballfield? (1)
2. Like the consolidated floor plan (1)
3. How does the second story work? (1)
4. Like saving the Auditorium and Reed Gymnasium (1)
5. Looks like a cell block (1)
6. Does not relate to the ballfield that well (1)
7. Question the success of the internal courtyards (1)
8. This design does not meet the campus goals (1)
9. Like this option as it allows for more playing fields (1)
10. "Freight train" configuration (1)
11. Why isn't the 1994 Library retained in any option? (1)

GROUP C: WEST OPTION 1

1. Where is the second Gymnasium? (1)
2. Could be very congested from pick-up and drop-off, as everything is happening in generally the same location (1)
3. School is too far from the Auditorium (1)
4. Why is the Auditorium so far from the school, the long corridor obstructs views to the woods (1)
5. This seems like a huge connecting corridor (2)
6. Too many clusters, loses the playing field (1)
7. This design facilitates the blending of ages (students), best for creating a school wide community (1)
8. Worst design, too close to the Hanscom design (1)
9. Better sense of Hub clusters in this design, but not as much of a relationship to the campus (1)

GROUP C: WEST OPTION 2

1. Looks like the playfield will be lost with this option (1)
2. Overall identity in the context of the “campus” is lacking (1)
3. Too broken up and most likely expensive to build (1)
4. Seems like a lot of exterior wall surface and heat loss (1)
5. My favorite option from the standpoint of architectural interest (1)
6. Second too worst design, not looking for architectural feats, but rather supporting educational goals (1)
7. Too far from the Auditorium (1)
8. What do the teachers think of this option? (2)
9. What is the benefit of being so far from the Auditorium? (1)
10. Can we get tiered options with respect to cost? (1)
